

CHOOSE DO

A NEW GENERATION OF DOCTORS

Doctors of Osteopathic Medicine, or DOs, are fully-licensed physicians who practice in all specialties of medicine. Emphasizing a whole-person approach to treatment and care, DOs are trained to listen and partner with their patients to help them get healthy and stay well.

Consider a Career as an Osteopathic Physician

- You want to make a difference in people's lives
- You believe that wellness calls for a whole-body approach that emphasizes prevention
- You want to focus on the person—not the problem
- You want to build a legacy, not just a career, by providing high-quality health care in your community and beyond

**The physician you want to become.
The education you'll need to get there.**
